

# Controls and compliance checklist

## Controls assessment checklist

Yes	No	Control
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Least Privilege
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Disaster recovery plans
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Password policies
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Separation of duties
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Firewall
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Intrusion detection system (IDS)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Backups
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Antivirus software
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Manual monitoring, maintenance, and intervention for legacy systems
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Encryption
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Password management system
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Locks (offices, storefront, warehouse)
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Closed-circuit television (CCTV) surveillance
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Fire detection/prevention (fire alarm, sprinkler system, etc.)

---

## Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Only authorized users have access to customers' credit card information.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Adopt secure password management policies.

#### General Data Protection Regulation (GDPR)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	E.U. customers' data is kept private/secured.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Ensure data is properly classified and inventoried.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Enforce privacy policies, procedures, and processes to properly document and maintain data.

#### System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	User access policies are established.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Sensitive data (PII/SPII) is confidential/private.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Data integrity ensures the data is consistent, complete, accurate, and has been validated.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Data is available to individuals authorized to access it.

---

## **Recommendations:**

To reduce risk (currently scored at 8/10) and improve compliance and cybersecurity maturity, Botium Toys should prioritize the following:

- 1. Implement Least Privilege & Role-Based Access Control**

Restrict access to sensitive data like credit card and customer info based on role. This aligns with both PCI DSS and SOC compliance requirements.

- 2. Deploy Encryption for Sensitive Data**

Encrypt cardholder and customer data both at rest and in transit to comply with PCI DSS and GDPR.

- 3. Install an Intrusion Detection System (IDS)**

An IDS will help detect abnormal traffic and provide real-time alerts for early threat mitigation.

- 4. Develop and Test a Disaster Recovery Plan**

Create and regularly test a documented disaster recovery plan to ensure business continuity in the event of system failure or breach.

- 5. Establish a Secure Password Management System**

Implement tools like password managers and enforce modern complexity rules and rotation policies.

**6. Set Up Regular Backups**

Back up critical data on a daily or weekly basis, storing copies off-site or on secure cloud platforms.

**7. Formalize Monitoring of Legacy Systems**

Schedule manual maintenance for legacy systems and document intervention protocols.

**8. Classify and Inventory All Assets**

Begin asset identification and classification to strengthen control over sensitive data, fulfilling NIST CSF's Identify function.

**9. Conduct Regular Security Training**

Make employees aware of their role in protecting customer data and complying with internal and external regulations.

**10. Prepare for External Audits**

Address SOC 1/2 gaps now to ensure readiness for potential audits from business partners or regulators.
